

UNL - CAMPUS MASTER PLAN UPDATE

The Clark Enersen Partners was hired by the University of Nebraska-Lincoln to develop a Campus Master Plan Update for approval by the UN Board of Regents in December of 2005. The project involves development of electronic base maps tied to the UNL geographic information system (GIS). The plan will document strategic planning goals and vision, land use, circulation, parking, open space, campus edges and entries, recreation, athletics, housing, academics and research. The planning process involves interviews, workshops, and charrettes with administrators, deans, directors, and faculty and student organizations as well as non-campus stakeholders including neighborhoods, downtown Lincoln, State Fair Park, and Antelope Valley. The final Master Plan will provide topical electronic maps, recommendations, implementation strategies, and a Master Plan concept graphic for both the city and east campuses.

LOCATION: Lincoln, Nebraska

PROJECT TYPE: Campus Master Plans

SERVICES: Planning
